

# Fleet Risk Engineering Proposition

## Fleet Risk Management

Vero believe that motor vehicle incidents are understandable, predictable and mostly preventable however, Vero also recognise that no two clients are the same as their very characteristics including size, location, resources, occupation and culture, have a direct impact on their ability to manage their motor fleet safely and economically.

Vero's Fleet Risk Management Framework is designed around this and offers a broad, user-friendly approach that clears the haze surrounding the challenge of keeping employee's safe on the

road. The framework focuses on key pillars that Vero has identified as the key building blocks of managing a safe motor fleet with a focus on driver safety and operational efficiency.

Improving risk management procedures is a journey. Vero offers to partner with fleet operators and brokers every step of the way. Our team works to compliment your existing risk management program and, in consultation with you and your insurance broker to deliver a combination of our RM offerings tailored to your requirements.

### RM Consult

Whether it's a gap analysis assessment or responding to a technical question, Vero can help mitigate risks by reviewing, assessing and reporting on claims performance and risk exposure.

Some of our RM Consult offerings include:

- Claims frequent fleets can receive regular claims analysis reporting, detailing trends and risk exposure areas of your fleet
- Claims frequent fleets can also receive quarterly/ bi-annual/ or annual in person meetings or teleconferences to discuss claim and industry trends
- Claims infrequent fleets can apply to receive a one-on-one and in-depth risk management master class over the course of 3 sessions. The master class is designed to support clients in evaluating, planning, and managing their risk management strategy
- Customers wishing to assess and re-design their risk management strategy may be eligible for a fleet risk framework gap analysis review

### RM Insight

Vero offers a wealth of resources and access to the latest in Fleet Risk Management information. Vero is constantly expanding our library of risk management resources to educate and assist Vero customers. Some of our RM Insight offerings include:

- One page Risk Insight articles on a range of common risk topics
- Root cause analysis resources
- Vehicle inspection templates
- Tool box talks
- Policy creation guides

### Risk Management

The framework focuses on key pillars that Vero has identified as the key building blocks of managing a safe motor fleet with a focus on driver safety and operational efficiency.

### RM Connect

Vero Risk Engineers are available to share their experience and knowledge through speaker presentations at technical forums, broker functions, workshops, or webinars

### RM Advancer

RM Advancer is a premier risk management awards night designed to recognise and reward the exceptional risk management achievements of Vero and GIO Workers Compensation customers
